I. General description and use

PP-170 (S-018) is a highly resistant to weather, very much durable competition hurdle, which is designed for hurdle race in national and international competitions. Main features:

- very durable construction – anodized one-piece aluminium frame, anodized telescope tubes and highly durable plastic top board made of ribbed profile
- easy to stack up because of special square feet
- spring-loaded button systems of height adjustment and counterweight selection
- special cut-outs for mounting crossbars
- it meets the international quality standards
- PP-170 has got the IAAF certificate **E-01-0331**

II. Technical specification

Code	PP-170	S-018
Hurdle type	one piece, competition, certified	one piece, competition
(A) Top board	plastic, with inside ribbing	plastic, with inside ribbing
(B) Telescope tube	anodized aluminium and dyed in blue*, spring-loaded button system of height adjustment	anodized aluminium and dyed in blue*, spring-loaded button system of height adjustment
(C) Frame	aluminium anodized	aluminium anodized
(D) Feet	aluminium anodized, permanently fixed to hurdle frame, spring-loaded button system of toppling force selection, counterweights equipped with guide rolls, special square profile makes it easy to stack up	aluminium anodized, permanently fixed to hurdle frame, spring-loaded button system of toppling force selection, counterweights equipped with guide rolls, special square profile makes it easy to stack up
Heights [mm]	-	686
	762	762
	840	840
	914	914
	990	990
	1067	1067
Weight [kg]	12	12

*There may be differences in hue among the telescope tubes within one production batch.

III. Operation and maintenance

The hurdle is ready for use immediately after delivery.

The height adjustment is done as follows:

- a) while holding the telescope tubes press the spring-loaded buttons simultaneously,
- b) slide the telescopes down or up to adjust the height until the buttons click,

- c) next the hurdle toppling force should be adjusted accordingly, so pull and hold the knob in the hurdle foot,

- d) then slide the counterweight to the corresponding height according to the label, then release the knob, do the same with the other hurdle foot.

During idle periods the hurdles must be stored in a roofed dry place. For optimal performance they should be stored and transported on Polanik hurdle carts: HC-23 and HC-34. After every athletics season the hurdles must be cleaned from sand (mud, dust and etc).

Even the best technical solutions cannot substitute for common sense. The usage of the product must take place under the supervision of qualified coaches. The producer shall not be liable for any incidents caused by its misuse.

IV. Packing and transport

The hurdles are put on pallets (15 pcs on one pallet) and wrapped with foil for short distances or sent overseas in cases.

Packing type		foiled pallet	case
Package's dimensions [cm]	contents	15 hurdles	15 hurdles
	length	122	127
	width	108	113
	height	175	187
Volume [m ³]		2,31	2,68
Gross weight [kg]		210	250
